- ★ **NAB:** Head of Architecture for Retail Banking (2006), Head of Architecture for NAB Distribution (2005)
- ★ **MLC:** Mature architecture practice (profiled as case study in a number of international conferences) as Head of Strategy and Architecture (1998-2004)
- ★ **HP:** technology infrastructure strategy, business cases for technology upgrades and data centre consolidation for Boral (1997)
- ★ **AT&T/NCR:** technology consulting to Telstra, Rockmans, Franklins, St. George Bank

*Recognised
technology
innovator
and industry
expert*

- ★ **TransportNSW:** Support calls KPI dashboards with AI/ML (2019), Proof of concept of omni-channel self service using chatbot, web site and mobile apps (2018)
- ★ **Broadspectrum:** Analytics roadmap and introduced self-service analytics tools and data lake (2015), "Flexible Edge" strategy for adopting and integrating innovative solutions to core systems (2015).
- ★ **ING:** Information hub and services-oriented bus as part of a strategic e-business implementation by leveraging global ING capability (2008)
- ★ **NAB/MLC:** Integrated financial advice platform through pioneering the use of cross platform services oriented architecture (J2EE and .NET) (2001-04) resulting in NAB being awarded a software patent.
- ★ Presented at various **international conferences** and published technical papers in a number of **technical journals**.

EXPERIENCE

PRINCIPAL CONSULTANT AND DIRECTOR, HELLO THAM — 2016-PRESENT

Provided strategic consulting services to TransportNSW and Broadspectrum:

- TransportNSW: Presented at 2nd TransportNSW Data Science conference on using fast.ai and AWS Sagemaker to classify support call incidents.
- TransportNSW: Mentored 2 women in other organisations as part of Females in IT program. Mentored a number of senior Transport employees (men and women) on an informal basis.
- TransportNSW: Participated as a committee member in Women in IT Leadership group and organised monthly Lunch and Learn sessions. Presented at 3 Lunch and Learn sessions on “Visual Thinking” with hundreds of attendees.
- TransportNSW: Conducted text analysis machine learning (using fast.ai framework and AWS Sagemaker) to determine whether it is possible to predict correct resolver group based on Incident description for IT incidents on Remedy.
- TransportNSW: Developed a set of management KPI dashboards using Tableau and Custom SQL accessing a near real-time replica of Remedy operational database on IT incidents. These dashboards are currently used for board and steering committee reporting as well as live monitoring of resolver group performance.
- TransportNSW: Facilitated and led a vendor sponsored Proof of Concept (of Corporate Services multi/omni channel framework) to develop a Chatbot servicing leave requests.
- TransportNSW: Led and developed a Proof of Concept (of Corporate Services multi/omni channel framework) demonstrating the ability of a Javascript web front end embedded in a ServiceNow portal accessing a backend Odata SAP service (via SAP Cloud Platform connecting to an on-premise ECC instance) for leave request, and provided input into a Service prototype extending the above Proof of Concept.
- TransportNSW: Led and developed a Proof of Concept (of Corporate Services multi/omni channel framework) of a native iOS app written in Swift authenticating via Azure Active Directory (AD) and accessing Outlook calendar and AD details via Microsoft Graph API, QR code scanning, and maintaining and updating current office location and leave requests via backend SAP Odata services (via SAP Cloud Platform connecting to an on-premise ECC instance).
- TransportNSW: Developed a user profile and multi-channel/omni-channel service framework to improve the user experience and unify access to corporate services.
- TransportNSW: Facilitated strategic business plan for Enterprise Services group.
- TransportNSW: Reconciled over \$75m of SAP enterprise licences for a large government agency and developed a set of PowerBI dashboards visualising the licence position.
- TransportNSW: Participated in IT Strategy refresh.
- TransportNSW: Developed a financial model and engaged Finance stakeholders for a business case for a multi-year investment program for a suite of Enterprise applications covering Enterprise Resource Planning, Talent and People Management, Procurement, Document Management and Enterprise Asset Management.
- TransportNSW: Established architecture governance model and established architecture boards and forums for Corporate and Shared Services, including acting as interim secretary until permanent members can be appointed.
- TransportNSW: Participated in the definition of an overall Governance Framework for Enterprise Shared Services applications and implemented aspects of Governance Model (including establishment of business, architecture, and change management governance forums).

- TransportNSW: Revised Operating Model for a Centre of Excellence covering Vision, Goals, Operating Principles, key services, metrics, roles and responsibilities, and future state organisational structure.
- TransportNSW: Developed 3 Business Cases and successfully secured over \$20m of funding to cover various aspects of Enterprise Shared Services applications change activities, including a Rolling Program to implement prioritised initiatives from Business Roadmap, and a ten year Asset Management Plan
- TransportNSW: Defined enterprise End to End process scenarios covered corporate and shared services functions of Hire to Retire, Time to Pay, Procure to Pay, Finance to Manage, Plan to Deliver and Asset Lifecycle Management that was subsequently endorsed by business stakeholders.
- TransportNSW: Led and established a Business roadmap for Enterprise Shared Services applications capturing desired business outcomes for the next 3-5 years that was endorsed by the Technology Leadership Council.
- Broadspectrum: Provided input to IT Strategy 2018.
- Broadspectrum: Led the sourcing of an “Analytics as a Service” provider to augment internal analytics skills, including developing and issuing RFI with key stakeholder approval, facilitating vendor review team, and provided final recommendations to COO.

STRATEGY CONSULTANT, BROADSPECTRUM — 2015-2016

Facilitated and co-developed IT Strategy, including development of roadmap and input into Board paper, and led the realisation of two of the strategic themes in the IT Strategy:

- “Flexible Edges”: Plug in sector/service specific solutions to complement core systems by adopting a pro-active stance regarding innovation and disruptive changes that deliver business value, aligned with user requirements
- “Analytics”: Increased use of data to drive performance using a combination of core platform, flexible edges and recent developments in data analytics (including self-service analytics using Tableau, AWS Redshift based “Big Data” analytics platform, “Internet of Things” sensor based monitoring and advanced analytics.

EXECUTIVE MANAGER, ARCHITECTURE AND DESIGN, TRANSFIELD SERVICES — 2014-2015

As interim leader (replacing a vacated position triggered by resignation of previous incumbent), successfully achieved all objectives (based on mid year performance review) including:

- Reviewed the roles, responsibilities and skill-sets of the Executive Manager position as well as team/function
- Defined the role of the SAP strategy and technical relationship management responsibilities and where this will sit within the team
- Assisted in the recruitment of the Executive Manager
- Leveraged the role of partners (SAP and WIPRO) within the team
- Reviewed existing team skills and fit and made recommendations on realigning the team to the desired team profile
- Identified and executed high priority strategic architecture initiatives - including updated architecture and roadmaps for FY2015-18

- Reviewed the forward workload plan for the team and introduced new resource request process to ensure the team deliver effective outcomes to stakeholders through a balanced mix of strategy and reactive work
- Lifted the team visibility, performance and engagement with stakeholders (as measured by feedback from Executive General Managers)
- Improved team morale and effectiveness through selective coaching to assist them in their personal development plans

STRATEGY CONSULTANT, TRANSFIELD SERVICES — 2011-2014

Consulted on various projects and strategic initiatives, including:

- facilitated the evaluation of field service management mobility solutions for work order management
- consolidated business requirements for a technology solution as part of the tender team responding to a major asset maintenance services contract renewal for a government client
- analysed implementation options for a support/shared services operating model
- established a data analytics capability in operations and business development
- evaluated of IT solution options for various operational contracts, including NBN, inserTS (subsidiary),
- implemented of a revised Global Management System for Quality and Performance Excellence
- initiation and participation in a business process improvement initiative to standardise business processes globally across the organisation
- establishment of a business process classification framework based on APQC
- commissioned and managed two external reviews of a strategic technology platform (SAP) implementation project
- advice on roles and responsibilities of the business technology partner function
- establishment of strategic IT architecture governance at executive level
- development of a strategic technology architecture and migration roadmap

CONSULTANT, THOROGOOD AND ASSOCIATES — 2011

- Developed material for a social media workshop
- Consulted on the business case for an online campus and Western Sydney campus for the University of New England

HEAD OF STRATEGY AND ARCHITECTURE, ING AUSTRALIA — 2008

- Successfully established IT Strategy and Architecture Function (team size: approximately 20) for ING Australia (against a prior history of several failed attempts to create an organisation wide architecture team).
- Key functions in new function include technology strategy and innovation facilitation, enterprise architecture, solution architecture and solution design/estimation.
- Defined the technology strategy and architecture governance model for ING Australia, as part of an overall technology operating model, including the establishment of the Technology Working Group (overall technology governance body), Technical Review Board (strategy and architecture review forum).

- Delivered technology roadmaps for key ING business units including Life Risk, Group Risk, Direct Insurances and provided input in the development of medium term plans for Wealth Management and Corporate Finance business units.

STRATEGY CONSULTANT, NAB GROUP — 2007

- Provided key input to development of Integrated Platform strategy for NAB Australian region to consolidate NAB technology and vendor diversity to four key strategic partners.
- Developed strategy and architecture for the NAB Corporate Centre functions (including Group Finance, Group Risk, Group Treasury, Group Audit, Corporate Secretariat).
- Part of a business strategy team that developed an Australian region business process model.

HEAD OF ARCHITECTURE, NAB RETAIL BANKING — 2006

- Reinvigorated a demoralised and decimated architecture that has lacked stable leadership for the last 3 years through a combination of personal coaching, targeted team building activities, and external hire (doubled size of team)
- Implemented new team operating model via a consultative approach
- Improved team involvement and engagement in key projects from minimal to mandatory (with all significant projects having an architect accountable for successful delivery of agreed architecture)
- Delivered several target architectures in the areas of document production, imaging/workflow and electronic forms

HEAD OF ARCHITECTURE, NAB DISTRIBUTION— 2005

- Created a new architecture function within a new business unit encompassing all distribution channels within NAB (retail banking, private banking, business banking, brokered, financial advisers).
- Team delivered a Sales, Servicing and Channels business architecture.
- As an individual, seconded for part of the period as the team lead for the architecture stream of the 2005 Technology Strategy for the Australian region.

HEAD OF STRATEGY AND ARCHITECTURE, MLC — 1998-2004

- Established the architecture function at MLC in a background of MLC re-establishing strategic control over technology from a fully outsourced IT operation (managed by IBM GSA).
- As Head of Architecture, oversaw the introduction of various strategic applications and technologies into MLC: including AdviserCentral, Compass, Masterkey, Siebel
- Established architecture governance processes, some elements of which are now used throughout NAB
- Consulted to the establishment of architecture governance processes at NAB's European operations, including Clydesdale and Yorkshire Banks, and NAB's wealth management operations in Europe.
- Established solution architecture role at MLC (and subsequently introduced as a standard role within NAB)
- Led the definition of MLC's IT Strategy in 1999 and led the application architecture stream in the 2001 IT Strategy.
- Part of team defining MLC's Enterprise Medium Term Vision, and business case for initiation of Amazon Programme (\$200m spend over 2001-2002).

ARCHITECTURE CONSULTANT, HEWLETT PACKARD — 1995-98

- Consulted to various organisations including Boral (technology infrastructure strategy, server upgrade business case, data centre consolidation business case)

ARCHITECTURE CONSULTANT, AT&T GLOBAL INFORMATION SOLUTIONS (NCR)— 1992-95

- Consulted to various organisations, including St. George Bank, Franklins, Rockmans, Telstra.

TREASURY ANALYST, STATE BANK VICTORIA— 1990-92

- Systems analysis and software development
- Financial instruments pricing and risk analysis

SYSTEMS ANALYST, OPTECH INTERNATIONAL — 1988-90

- Systems analysis and software development
- Financial instruments pricing and risk analysis

CASUAL STAFF, BAIN & COMPANY — 1986-88

- System administration and software development

TUTOR, UNIVERSITY OF SYDNEY — 1987

- Casual tutor in Basser Department of Computer Science

EDUCATION**MASTER OF APPLIED FINANCE, MACQUARIE UNIVERSITY (1994)**

- Awarded: Australian Institute of Bankers Prize for Management of Financial Institutions
- Awarded: Australian Institute of Bankers “The Institute Prize” (for graduating top of class)

GRADUATE DIPLOMA, SECURITIES INSTITUTE OF AUSTRALIA (1992)**BACHELOR OF SCIENCE (1ST CLASS HONOURS AND UNIVERSITY MEDAL), UNIVERSITY OF SYDNEY (1988)**

- Awarded: E. Trenchard Miller Memorial Scholarship
- Awarded: University Postgraduate Research Award upon graduation

PAPERS/CONFERENCES

- Presented several times to Tableau User Group in Sydney.
- Presented to RLadies Sydney.
- Presented at conferences, eg. Bank.Tech.06, Microsoft Architecture Council, ACS NSW Branch Forum, insto Banking and Technology and profiled in an article in ComputerWorld Australia (May 2005)
- Co-authored technical paper “UNIX Password Encryption considered insecure” (USENIX)
- Developed a method for distributed/parallel computation of options risk management as part of a foreign options trading system (presented in Sun Tech Journal Vol. 3 No. 1)
- Honours thesis on a computer language for representing and processing music (University Medal 1989)
