PROFILE

Founder of Hello Tham, a boutique strategy consulting company. Available for short to medium term consulting engagements spanning strategic business change, business and operating model design, business process improvement, and technology strategy, architecture and solutions.

KEY ACHIEVEMENTS

- **Flexible strategic change agent and thought leader** — Led IT strategies and operating models for Transport for NSW, Transfield Services, ING, NAB and MLC. I continue that work today through Hello Tham, the boutique consultancy I founded in 2016.
- **Successful and proven technology strategy and architecture leader** — Head of Architecture roles at NAB, ING and MLC, where my practice was profiled as a case study at international conferences. I am currently the Enterprise Architect at Cochlear.
- **Recognised technology innovator and industry expert** — Pioneered AI/ML dashboards, omni-channel self-service chatbots and the service-oriented architecture that earned NAB a software patent. These days I shape AI architecture at Cochlear, teach Information Systems at Torrens University and have written AI-dō, a book on working with AI.

PROFESSIONAL EXPERIENCE

Enterprise Architect (Consulting) 2025 – Present
Cochlear

- Enterprise architecture within Technology & Data Solutions, improving enterprise coherence across federated business domains while enabling faster, safer delivery through reusable architecture services, live architecture repositories, governed AI patterns and measurable architecture value.
- Developed enterprise architecture service models, reusable architecture deliverables and assurance practices across advisory, planning and solution architecture services.
- Designed the EA metrics framework and LeanIX-based executive reporting approach to measure architecture value, repository health, strategic alignment, technology risk, technical debt and governance effectiveness.

Learning Facilitator 2024 – Present
Torrens University Australia

- Lecturer in Information Systems in the School of Business, teaching undergraduate and masters students.
- Awarded the Learning and Teaching Merit Award twice, with perfect student satisfaction scores in end-of-trimester student evaluation surveys.

Principal Consultant and Director 2016 – Present
Hello Tham

- Founder and director of a boutique consultancy spanning business and IT strategy, enterprise architecture, operating models, strategic roadmaps, analytics and data science, digital products and content platforms.
- Author of **AI-dō: The Way of AI**, and developer of **FinvestLens** and **HelloNotes**, two native Apple applications published as free software.
- Successfully delivered multiple consulting engagements, including Cochlear, Transport for NSW and Broadspectrum.
