

Chris Tham

Strategy Consultant | Technology Strategy, Architecture and Business Change

chris@christham.net · +61 413 008 577 · Sydney, Australia · linkedin.com/in/christham · christham.net

PROFILE

Founder of Hello Tham, a boutique strategy consulting company. Available for short to medium term consulting engagements spanning strategic business change, business and operating model design, business process improvement, and technology strategy, architecture and solutions.

KEY ACHIEVEMENTS

- Flexible strategic change agent and thought leader** — I have facilitated business and technology strategic change for three decades – from Head of Strategy positions at MLC, NAB and ING to delivering IT strategies, roadmaps and operating models as a consultant to Transfield Services and Transport for NSW (through my consulting company Hello Tham).
- Successful and proven technology strategy and architecture leader** — I have built successful architecture practices at organisations from MLC (where I wrote my own job description and built a practice that became a case study at international conferences) to NAB, ING and Broadspectrum. I have provided enterprise architecture advice as a consultant to Transport for NSW and currently at Cochlear.
- Recognised technology innovator and industry expert** — I have been involved in new technologies for my entire career, from early beginnings managing one of Australia's first commercial UNIX systems at Bain & Co (and also one of the earliest non-academic institutions to be on the Internet), to a patented service-oriented advice platform my team pioneered at MLC, to using a large language model to classify support calls in 2018, long before ChatGPT. Most recently I shaped Cochlear's AI strategy. I teach Information Systems at Torrens University, and have written *AI-dō*, a book on using AI effectively.

PROFESSIONAL EXPERIENCE

Enterprise Architect (Consulting) 2025 – Present
Cochlear

- Enterprise architecture within Technology & Data Solutions, improving enterprise coherence across federated business domains while enabling faster, safer delivery through reusable architecture services, live architecture repositories, governed AI patterns and measurable architecture value.
- Developed enterprise architecture service models, reusable architecture deliverables and assurance practices across advisory, planning and solution architecture services.

Learning Facilitator 2024 – Present
Torrens University Australia

- Lecturer in Information Systems in the School of Business, teaching undergraduate and masters students.
- Awarded the Learning and Teaching Merit Award twice, with perfect student satisfaction scores in end-of-trimester student evaluation surveys.

Principal Consultant and Director 2016 – Present
Hello Tham

- Founder and director of a boutique consultancy spanning business and IT strategy, enterprise architecture, operating models, strategic roadmaps, analytics and data science, digital products and content platforms.
- Author of *AI-dō: The Way of AI*, and developer of *FinvestLens* and *HelloNotes*, two native Apple applications published as free software.
